- **Imali** :

Description: VAST tag is an XML document format describing an ad to be displayed in, over, or around a Video Player or a Wrapper pointing to a downstream VAST document to be requested The project

Contained 3 major players:

- **Advertiser** - this player supplies us with video ads tags (VAST) and pays us according to video impressions (how many times the video ads were played)
- **Publisher** - this is the owner of traffic sources, we buy space for the video ads tags from this player.
- **Video Ads Admin** - this is a person inside Imali who is responsible for taking a tag from the Advertiser, inserting into our system, and giving an Imali tag to the publisher. The purpose of this project is Imali to have the ability to take an advertiser VAST tag, wrap it in our own VAST tag and give it to publishers.

Responsibility: worked on the rest api's, handled the database, worked on AWS S3 bucket to backup the data to S3 bucket periodically from Postgres Server to AWS S3 .

➤ **venndy :**

Description : VENNDY is all about collection, connection, and collaboration for and between people. VENNDY is a user-generated content platform that focuses on contextual connectivity. It offers a new way to share the right content in the right context with the right audience. Using its proprietary algorithm, VENNDY offers users a multi-layered connectivity system which consolidates the best of stories, items, and people to follow.

Venndy Admin panel: The Admin Panel gives a detailed information of the venners. Admin can control all the veneers and its items and stories.

Technologies: Laravel, Angular Js, JQuery, MySql, Bootstrap, HTML5, **ReactJS**(Used in admin pannel)

- **vettedpetcare :**vettedpetcare was founded by a group of experts from the home healthcare, tech, and pet industries. As cat and dog owners ourselves, we saw firsthand that the traditional approach to veterinary care just wasn't effective; our pets deserved better.

Technologies: Laravel, JQuery, MySql, Bootstrap, HTML5
